- 219 Corporate Directory\*

<sup>\*</sup>Collectively, these items, along with the investment reviews disclosed within the individual Fund reports, comprise the Authorised Corporate Director's Report for the purposes of the rules contained in the Financial Conduct Authority's Collective Investment Schemes Sourcebook.

### **Authorised Corporate Director's Report**

We are pleased to present the Interim Report for First Sentier Investors ICVC (the "Company"), which provides information on each of the 22 sub-funds of the Company (each a "Fund") for the period ended 31 January 2024.

In this document we provide detailed information on each of the Funds. This information includes an investment report, performance summary, top 10 holdings, country breakdowns, and financial statements for each Fund.

First Sentier Investors (UK) Funds Limited (the "ACD") is part of First Sentier Investors, a member of the global financial group Mitsubishi UFJ Financial Group ('MUFG').

First Sentier Investors routinely monitors our portfolios for Russian, Ukrainian and Belarusian companies that derive a material portion of their revenues/ profits from Russian, Ukrainian and/or Belarusian business relationships and actively screens existing and prospective clients. The firm has controls in place to ensure it is, and will remain, compliant with sanctions — these controls include investment restrictions and ongoing monitoring of sanctions from authorities globally — and will adapt risk and control policies as required.

Please note there have been no developments occurring during the period, other than the Prospectus changes shown on page 2.

We hope that you find this report informative and that it answers any questions you may have about your investment with First Sentier Investors.

If you have any additional queries in relation to your investment, or one of the Funds, please contact our Client Services team on 0800 587 3388 (UK investors only) (+44 (0)203 528 4102 if calling from outside the UK).

### Information about the Company

The Company is an Open-Ended Investment Company with variable capital. The Company is structured as an umbrella company currently authorised as a UK UCITS scheme and operates under Chapter 5 of the Collective Investment Schemes Sourcebook ("COLL").

Different Funds may be established from time to time by the ACD, with the approval of the Financial Conduct Authority ("FCA") and the agreement of the Company's Depositary, the Bank of New York Mellon (International) Limited. Each Fund may issue different classes of share and, within each class, there may be different types of share. On the introduction of any new Fund or class or type of share, a revised Prospectus will be prepared setting out the relevant details of each Fund or class.

Each Fund is invested as if it were individually authorised as the type of scheme known as a UK UCITS scheme, as specified in the Sourcebook. For investment purposes, the assets of each Fund will be treated as separate from those of every other Fund and will be invested in accordance with the investment objective and investment policy applicable to that Fund. The shareholders are not liable for the debts of the Company.

### Changes to the Prospectus since 1 August 2023

### Inclusions or amendments in the Company's Prospectus dated 19 December 2023:

- 1. Removal of First Sentier Diversified Growth Fund throughout Prospectus following successful termination;
- 2. Removal of Stewart Investors Latin America Fund throughout Prospectus following successful termination;
- 3. Annual update to Anti-Dilution Adjustment Data/figures for all relevant sub-funds;
- 4. Update to articulation of tax disclosure relevant to Dividend Distributions;
- 5. Update to articulation of FSSA Japan Focus Fund Benchmark to remove references to historic benchmark (MSCI Japan Index) and refer only to updated Benchmark, TOPIX;
- 6. Update to Appendix VII List of Delegates and Sub-Delegates.

### The Investment Manager

As at the date of this Report, First Sentier Investors (UK) IM Limited, the investment manager of the Company (the "Investment Manager"), has delegated the investment management of certain Funds as set-out in the following table:

		Delegated to First Sentier Investors (HK) Limited	Delegated to First Sentier Investors Singapore	Delegated to First Sentier Investors (Australia) IM Limited
1	FSSA All China Fund	X		
2	FSSA Asia All-Cap Fund	Х	Х	
3	FSSA Asia Focus Fund	X		
4	FSSA Greater China Growth Fund	Х		
5	FSSA Indian Subcontinent All-Cap Fund		Х

<sup>\*</sup>The Stewart Investors Global Emerging Markets Fund is in the process of termination.

### **Cross Holdings**

There were no cross holdings between Funds as at 31 January 2024.

<sup>\*\*</sup>The Stewart Investors Global Emerging Markets Leaders Sustainability Fund is in the process of termination.

<sup>\*\*\*</sup>The First Sentier Asian Property Securities Fund is in the process of termination.

Certain Funds pursue responsible or sustainable investment strategies and/or pursue ESG/sustainability characteristics, themes or outcomes. For these Funds (referred to in this section below), we aim to make information readily available on how well each Fund is meeting its stated objectives (i.e. the intended ESG/sustainability characteristics, themes or outcomes) on an ongoing basis to enable investors to monitor whether their expectations are being met. The regulatory environment for these types of funds is rapidly developing in the UK, the EU and elsewhere, including in relation to reporting obligations. We expect our disclosures to develop over time in light of these developments.

Stewart Investors Asia Pacific and Japan Sustainability Fund, Stewart Investors Asia Pacific Leaders Sustainability Fund, Stewart Investors Asia Pacific Sustainability Fund, Stewart Investors Indian Subcontinent Sustainability Fund, Stewart Investors European (ex UK) Sustainability Fund, Stewart Investors Global Emerging Markets Sustainability Fund, Stewart Investors Global Emerging Markets Leaders Fund, Stewart Investors Worldwide Leaders Sustainability Fund and Stewart Investors Worldwide Sustainability Fund (in this section referred to as the "Funds").

The Funds seek to achieve long-term capital appreciation by investing in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, while many also contribute to positive environmental outcomes.

The contribution of the Funds' investments to the social and environmental outcomes are assessed by reference to the two frameworks described below.

### Positive social outcomes - Human Development Pillars

Stewart Investors assesses positive social outcomes by reference to the below human development pillars. Stewart Investors has developed these human development pillars, by reference to, amongst other things, the UN Human Development Index.

- Health and well-being improved access to and affordability of nutrition, healthcare and hygiene, water and sanitation.
- Physical infrastructure improved access to and affordability of energy and housing.
- **Economic welfare** safe employment offering a living wage and opportunities for advancement, access to finance and improved standards of living.
- Opportunity and empowerment improved access to and affordability of education and information technology.

Further information about how the Investment Manager uses the human development pillars is available on the Investment Manager's website – https://www.stewartinvestors.com/uk/en/private-investor/how-we-invest/our-approach/human-development-pillars.html

### Positive environmental outcomes - Project Drawdown climate solutions

Stewart Investors assesses positive environmental outcomes by reference to the climate solutions developed by Project Drawdown<sup>1</sup>, a non-profit organisation that has modelled over 90 different climate solutions that it believes will contribute to reaching drawdown - i.e. the point in the future when emissions stop increasing and start to decline.

Below is a list of climate solutions together with corresponding examples Stewart Investors believes lead to positive environmental outcomes:

- Food system sustainable farming, food production and distribution of food-related products and services.
- Energy adoption of renewable energy and other clean energy and related technologies.
- Circular economy and industries improved efficiency, reduced waste, and new business models for closing resource loops in linear value chains and production processes.
- Human development advancement of human rights and education that drive environmental conservation and sustainable use of resources.
- Transport efficient transport technologies and growth in fossil fuel-free transportation options.
- **Buildings** products and services which reduce the environmental footprint of the built environment, including energy efficiency, electrification, improved design, and use of alternative materials.
- Water less energy-intensive methods for treating, transporting and heating water.
- Conservation and restoration supporting deforestation-free and environmentally regenerative supply chains, operations and end-of-life impacts.

Further information about how the Investment Manager uses the Project Drawdown climate solutions is available on the Investment Manager's website – <a href="https://www.stewartinvestors.com/uk/en/private-investor/how-we-invest/our-approach/climate-solutions.html">https://www.stewartinvestors.com/uk/en/private-investor/how-we-invest/our-approach/climate-solutions.html</a>

Any reference to Project Drawdown is to describe the publicly available materials utilised by Stewart Investors in formulating its sustainability analysis framework. It is not intended to be, and should not be, read as constituting or implying that Project Drawdown has reviewed or otherwise endorsed the Stewart Investors framework. For the list of Project Drawdown climate solutions please go to https://drawdown.org/solutions/table-of-solutions.

(continued)

#### Assessment

In assessing whether a company "contributes to and benefits from" sustainable development, the Investment Manager will consider whether:

- 1. there is either a direct<sup>1</sup> or enabling<sup>2</sup> link between the activities of the company and the achievement of a positive social or environmental outcome:
- 2. any contribution to positive social or environmental outcomes has resulted from revenue or growth drivers inherent in the company's business model, strategic initiatives that are backed by research and development or capital expenditure, or from the company's strong culture and sense of stewardship e.g. for equity and diversity; and
- 3. the company recognises potential negative social or environmental outcomes associated with its product or services and works towards minimising such outcomes, e.g. a company that sells affordable nutritious food products in plastic packaging, but is investigating alternative packaging options.

### Fund reporting

The social and environmental outcomes for the Funds as at 31 December 2023 are provided below.

Stewart Investors Asia Pacific and Japan Sustainability Fund

As at 31 December 2023 the Fund held 58 companies

# All companies (100%) were contributing to at least one human development pillar and, in total, were making 157 contributions to the pillars.

Positive social outcomes

**36 companies (62%)** were contributing to climate change solutions. These companies were contributing to **36 different solutions** and, in total, were making **112 contributions** to the solutions.

Positive environmental outcomes

Stewart Investors Asia Pacific Leaders Sustainability Fund

As at 31 December 2023 the Fund held 41 companies

### Positive social outcomes

### Positive environmental outcomes

All companies (100%) were contributing to at least one human development pillar and, in total, were making 118 contributions to the pillars.

**26 companies (63%)** were contributing to climate change solutions. These companies were contributing to **31 different solutions** and, in total, were making **91 contributions** to the solutions.

Stewart Investors Asia Pacific Sustainability Fund

As at 31 December 2023 the Fund held 65 companies

### Positive social outcomes

### Positive environmental outcomes

All companies (100%) were contributing to at least one human development pillar and, in total, were making 178 contributions to the pillars.

**40 companies (62%)** were contributing to climate change solutions. These companies were contributing to **39 different solutions** and, in total, were making **129 contributions** to the solutions.

Stewart Investors Indian Subcontinent Sustainability Fund

As at 31 December 2023 the Fund held 37 companies

#### Positive social outcomes

#### Positive environmental outcomes

All companies (100%) were contributing to at least one human development pillar and, in total, were making 107 contributions to the pillars.

**22 companies (59%)** were contributing to climate change solutions. These companies were contributing to **38 different solutions** and, in total, were making **78 contributions** to the solutions.

Stewart Investors European (ex UK) Sustainability Fund

As at 31 December 2023 the Fund held 40 companies

#### Positive social outcomes

#### Positive environmental outcomes

All companies (100%) were contributing to at least one human development pillar and, in total, were making 100 contributions to the pillars.

**32 companies (80%)** were contributing to climate change solutions. These companies were contributing to **42 different solutions** and, in total, were making **108 contributions** to the solutions.

A direct link would arise where the goods an entity produces or the services it provides are the primary means through which the positive social or environmental outcome can be achieved (e.g. solar panel manufacturers or installers).

An enabling link would arise if the goods a company produces or services it provides enable other companies to contribute towards the achievement of the positive social or environmental outcome (e.g. manufacturers of critical components that are used as inputs in the manufacture of solar panels).

(continued)

### Stewart Investors Global Emerging Markets Leaders Fund

As at 31 December 2023 the Fund held 47 companies

### Positive social outcomes

### Positive environmental outcomes

All companies (100%) were contributing to at least one human development pillar and, in total, were making 133 contributions to the pillars.

**30 companies (64%)** were contributing to climate change solutions. These companies were contributing to **31 different solutions** and, in total, were making **96 contributions** to the solutions.

### Stewart Investors Global Emerging Markets Sustainability Fund

As at 31 December 2023 the Fund held 57 companies

#### Positive social outcomes

### Positive environmental outcomes

All companies (100%) were contributing to at least one human development pillar and, in total, were making 167 contributions to the pillars.

**36 companies (63%)** were contributing to climate change solutions. These companies were contributing to **33 different solutions** and, in total, were making **111 contributions** to the solutions.

#### Stewart Investors Worldwide Leaders Sustainability Fund

As at 31 December 2023 the Fund held 38 companies

#### Positive social outcomes

#### Positive environmental outcomes

All companies (100%) were contributing to at least one human development pillar and, in total, were making 98 contributions to the pillars.

**30 companies (79%)** were contributing to climate change solutions. These companies were contributing to **36 different solutions** and, in total, were making **94 contributions** to the solutions.

#### Stewart Investors Worldwide Sustainability Fund

As at 31 December 2023 the Fund held 50 companies

### Positive social outcomes

### Positive environmental outcomes

All companies (100%) were contributing to at least one human development pillar and, in total, were making 119 contributions to the pillars.

**36 companies (72%)** were contributing to climate change solutions. These companies were contributing to **41 different solutions** and, in total, were making **114 contributions** to the solutions.

In addition, the Investment Manager's **Portfolio Explorer tool** (link below) provides the contribution that each investee company makes to climate solutions and human development, as well as the investment rationale, Sustainable Development Goals, key risks, and areas for improvement. The company holdings information is updated on a guarterly basis.

https://www.stewartinvestors.com/uk/en/private-investor/how-we-invest/our-approach/portfolio-explorer.html

The Investment Manager also provides summary charts for each Fund on their website and the First Sentier Investors website. The charts (links below) are updated twice a year.

Stewart Investors website - <a href="https://www.stewartinvestors.com/uk/en/private-investor/how-we-invest/regulations-and-reports/fund-reporting.html">https://www.stewartinvestors.com/uk/en/private-investor/how-we-invest/regulations-and-reports/fund-reporting.html</a>
First Sentier Investors website - <a href="https://www.firstsentierinvestors.com/uk/en/private/performance/literature/fund-reporting.html">https://www.firstsentierinvestors.com/uk/en/private/performance/literature/fund-reporting.html</a>

### Exposure to harmful or controversial products, services or practices

The Funds only invest in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, and may also contribute to positive environmental outcomes.

The Investment Manager meets and liaises with companies on an on-going basis and is continuously assessing their sustainability credentials and quality. The Investment Manager also receives regular updates from a controversy monitoring service. Where the Investment Manager has identified changes to a company's quality or sustainability positioning through either meetings, ongoing monitoring and reviewing their annual reports, the Investment Manager will re-evaluate the investment case.

The Funds' exposure to harmful or controversial products, services or practices is monitored on at least a quarterly basis. This includes an assessment for compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN global norms and exposure to high-risk sectors. For harmful products and services which are revenue-generating, the Investment Manager applies a 5% revenue threshold (0% threshold for tobacco production and controversial weapons). In other areas where harmful or controversial activities are not attributable to revenue (for example, employee or supply chain issues) the Investment Manager uses internal analysis and research from external providers to monitor and assess companies.

(continued)

The Investment Manager's **position on harmful and controversial products**, **services or practices (link below)** is disclosed on their website. Part of this disclosure includes details of any companies held across the Funds that generate revenue above the set materiality threshold for direct involvement in a relevant activity together with the reason for continuing to own the company.

https://www.stewartinvestors.com/uk/en/private-investor/insights/our-position-on-harmful-and-controversial-products-and-services.html

### First Sentier Responsible Listed Infrastructure Fund ("RLIS")

RLIS promotes the following environmental and social characteristics:

Environmental characteristics:

Activities that contribute to or benefit from sustainable development, as guided by the United Nations' Sustainable Development Goals (SDGs). The main focus of the Investment Manager is on the following SDGs:

- SDG 6: Clean Water and Sanitation
- SDG 7: Affordable and Clean Energy
- SDG 9: Industry, Innovation and Infrastructure
- SDG 11: Sustainable Cities and Communities
- SDG 12: Responsible Consumption and Production
- SDG 13: Climate Action.

Climate change mitigation (via a reduction in carbon intensity (measured as carbon emissions per MWh)<sup>2</sup>, the establishment of energy infrastructure required for enabling the decarbonisation of energy systems, and the production of clean and efficient fuels from renewable or carbon-neutral sources);

### Social characteristics:

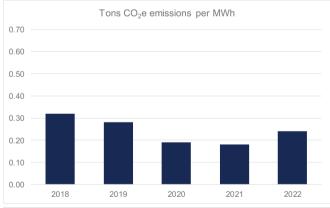

The protection of labour rights, and the provision of safe and secure working environments for all workers.

The following shows the indicators used by the portfolio to measure those characteristics, and the Fund's performance against those indicators, using the most recent date that the relevant data is available for.

Environmental: For utility companies with material<sup>1</sup> energy generation assets, demonstrating declining carbon intensity<sup>2</sup> (as measured by tons of carbon emitted per MWh of electricity generated) over rolling five year periods; or carbon intensity at least 25% below the industry average.

Power generated by utilities typically represents around 90% of portfolio emissions. Emissions per MWh declined by 25% over the five year period. Adjusting for changes in corporate structure and or capacity factors, each utility in the portfolio reduced their carbon intensity over this period.

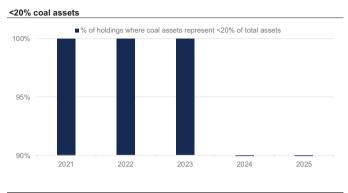

Data as at 31 December 2022, for portfolio holdings as 31 December 2023. Source: First Sentier Investors, Bloomberg.

<sup>&</sup>lt;sup>1</sup> Over 2GW of energy generation capacity.

<sup>&</sup>lt;sup>2</sup> The measure of carbon intensity over time may be adjusted to take into account circumstances including but not limited to corporate restructurings such as an investment's acquisition or divestment of energy generation assets, or changes in capacity factors i.e. how often different power plants are being run at maximum power requiring non-renewable energy sources.

(continued)

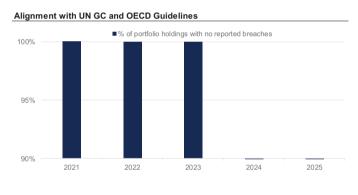

20% limit to coal generation exposure (as measured by the proportion of a company's overall assets that consist of coal-fired generation assets). Each electricity-generating utility held by the portfolio during the reference period was compliant with this sustainability indicator.

Data as at 31 December 2023

During the period under review, all portfolio holdings contributed to or benefitted from sustainable development, as guided by the UN SDGs. The portfolio's holdings were all compliant with this sustainability indicator during the reference period.

Based on analysis from our external data provider, none of the portfolio's holdings were deemed to be in violation of either the UN Global Compact, or of the OECD Guidelines for Multinational Enterprises, during the reference period.

Data as at 31 December 2023

## Statement of the Authorised Corporate Director's Responsibilities in Respect of the Financial Statements of the Company

The Authorised Corporate Director ("ACD") of First Sentier Investors ICVC is responsible for preparing the Interim Report and financial statements in accordance with the Open-Ended Investment Companies Regulations 2001 ("the OEIC Regulations"), the Financial Conduct Services Authority's Collective Investment Schemes Sourcebook ("COLL") and the Company's Instrument of Incorporation.

The OEIC Regulations and COLL require the ACD to prepare financial statements for each interim accounting period which:

- are in accordance with United Kingdom Generally Accepted Accounting Practice ("United Kingdom Accounting Standards"), including FRS 102 "The Financial Reporting Standards Applicable in the UK and Republic of Ireland" and the Statement of Recommended Practice: "Financial Statements of Authorised Funds" issued by the Investment Management Association ("IMA SORP") in May 2014; and
- give a true and fair view of the financial position of the Company and each of its sub-funds as at the end of that period and the net revenue and the net capital gains or losses on the property of the Company and each of its sub-funds for that period.

In preparing the financial statements, the ACD is required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards and the IMA SORP have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation.

The ACD is responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the applicable IMA SORP and United Kingdom Accounting Standards and applicable law. The ACD is also responsible for the system of internal controls, for safeguarding the assets of the Company and for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Executes him accordance with COLL 4.5.8BR on behalf of the ACD.

Jane Daniel

For and on behalf of First Sentier Investors (UK) Funds Limited Authorised Corporate Director of First Sentier Investors ICVC 25 March 2024 Docusigned by:

Gary Cotton

Director A465EB40FE334B6.

For and on behalf of First Sentier Investors (UK) Funds Limited Authorised Corporate Director of First Sentier Investors ICVC 25 March 2024

### Summary of Significant Accounting Policies Applicable to All Funds

as at 31 January 2024 (unaudited)

### 1. Accounting and distribution policies

### (a) Basis of accounting

The Financial Statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with FRS 102 'The Financial Reporting Standards Applicable in the UK and Republic of Ireland', the Statement of Recommended Practice ('SORP') for Financial Statements of UK Authorised Funds issued by the Investment Association in May 2014 (updated in June 2017), and United Kingdom Generally Accepted Accounting Practice.

As described in the Certification of Financial Statements by Directors of the ACD on page 9, the ACD continues to adopt the going concern basis in the preparation of the Financial Statements of the Funds, with the exception of; First Sentier Asian Property Securities Fund, which closed on 24 January 2023 and is due to terminate once the residual assets and liabilities are settled; Stewart Investors Global Emerging Markets Fund, which closed on 14 July 2023 and is due to terminate once the residual assets and liabilities are settled and Stewart Investors Global Emerging Markets Leaders Sustainability Fund, which closed on 14 July 2023 and is due to terminate once the residual assets and liabilities are settled. In applying this basis of preparation, the assets and liabilities of the Funds continue to be stated at their fair values. No adjustments were necessary in the financial statements to reduce assets to their realisable values, or provide for liabilities arising and to reclassify long-term liabilities as current liabilities.

All other accounting and distribution policies used to prepare the interim financial statements are as per the audited financial statements for the year ended 31 July 2023.

### 2. Other matters

### (a) High Court Claim

The European Court of Justice has held that the UK tax regime in respect of income from portfolio investments contravened the EU right to free movement of capital. Until 2009, income from portfolio investments in the UK was exempt from corporation tax, whilst dividend income from foreign portfolio investments was taxable with limited relief for foreign tax paid. The Company has made claims against HMRC for repayment of tax paid on dividend income from foreign portfolio investments in these circumstances. The claims form part of the CFC and Dividend Group Litigation, in which there are various test cases, including the Prudential dividend test case, in which a Supreme Court judgement was delivered on 25 July 2018. Some Funds in the Company received payments from HMRC under this litigation which were reflected in those Funds' financial statements as at 31 July 2020. Further litigation and tax tribunal actions are still ongoing in relation to various remaining issues. The value that each Fund has in these ongoing claims has not been recognised in the Financial Statements as the timing and amount of any benefit is uncertain. In the event that the remaining claims are successful, any monies awarded by the court will, upon receipt, be treated as windfall amounts in the relevant Funds and will form part of any distributable income.

### (b) Foreign Retrospective tax claims

A number of Funds are in the process of reclaiming refunds of dividend withholding tax on the basis of free movement of capital provisions in the European Union. Upon receipt, these amounts will be treated as windfall amounts in the relevant Funds and will form part of any distributable income.

### Authorised Fund Manager's Report

for the period ended 31 January 2024 (unaudited)

### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

The Fund invests at least 70% of its Net Asset Value in a portfolio of equity or equity-related securities issued by companies established or having a majority of their economic activities in the People's Republic of China that are listed, traded or dealt in on Regulated Markets worldwide.

The Fund has no set target for the number of companies it will invest in but the Manager anticipates that typically the Fund will invest in around 40 – 60 stocks. This does not represent a constraint on the number of holdings which may from time to time fall outside of that range.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies and other short-term securities listed, traded or dealt in on a Regulated Market. The short-term securities in which the Fund may invest will include securities such as commercial paper, certificates of deposit, treasury bills and bankers' acceptances all rated at investment grade or above or, if unrated, of equivalent guality in the view of the Investment Manager or Sub-Investment Manager. For defensive purposes where necessary to protect investor value during periods of perceived uncertainty and volatility (e.g., market crash or major financial crisis) or in the context of exchange controls, or other situations where, in the opinion of the Investment Manager or Sub-Investment Manager, it may be necessary to protect the interests of investors, the Fund may also hold assets in corporate and/or government debt securities or debentures which must be rated at investment grade or above or, if unrated, of equivalent quality in the view of the Investment Manager or Sub-Investment Manager and which are listed, traded or dealt in on a Regulated Market.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

	← Lower Risk Potentially Lower Rewards					Higher Risk →		
					Potentially Higher Reward			
Share class B Accumulation	1	2	3	4	5	6	7	
Share class E Accumulation	1	2	3	4	5	6	7	
Share class B Accumulation (USD share class)	1	2	3	4	5	6	7	

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 6 due to its past performance and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a Fund that invests in a large number of companies.

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

### **Authorised Fund Manager's Report**

(continued)

for the period ended 31 January 2024 (unaudited)

**Smaller companies risk:** Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies. For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund fell by 29.0% in sterling terms over six months and provided a cumulative return of -48.1% and 3.2% over three and five years respectively to the end of January 2024 (net of fees and tax for the B GBP Accumulation share class).

Key contributors to performance included ACM Research, which reported strong earnings results, with revenue and net profit significantly ahead of estimates. Silergy showed signs of an improving outlook, with better-than expected sales and improved gross margins from currency gains.

On the negative side, **JD.com** fell on concerns about slowing sales growth and rising competition. However, the franchise is still solid and valuations are attractive. **China Mengniu Dairy** has been affected by weak consumer demand as China's economic recovery remains fragile.

### **Portfolio Changes**

The Fund purchased Silergy, a domestic technology leader in Power Management Integrated Circuits. Silergy's four founders are well regarded and all have blue chip experience from leading US analogue companies. The company is considered to have the best research and development capabilities, and the most competitive products, in the industry.

The Fund divested NetEase on concerns about rising regulatory risks and sold Weichai Power to raise cash for better ideas elsewhere.

#### Outlook

Investing in China's dynamic market comes with an evolving set of challenges and opportunities. Today, the key challenges include shifts in geopolitics, policy priorities and demographics. In the shorter term, weak consumer confidence and rising unemployment have been additional areas of concern. The quality of Chinese companies and management have improved over the years and there is room for industry leaders to continue to deliver attractive returns in a maturing economy.

As always, the Fund seeks to invest in quality companies with proven management, dominant franchises and conservative financials. The Investment Manager has taken the opportunity to build up some of the smaller positions in the portfolio, while also adding on weakness to its high conviction and core long-term holdings.

### Cumulative performance as at 31 January 2024

Time	3	6	1	3	5	Since
period	mths	mths	yr	yrs	yrs	launch*
Fund return %	(17.9)	(29.0)	(39.1)	(48.1)	3.2	(1.6)

Dictribution

Dictributions

This share class is in deficit and therefore not making a distribution.

### Corporate tax for all share classes (unaudited)

Interim

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### **Authorised Fund Manager's Report**

for the period ended 31 January 2024 (unaudited)

### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

The Fund invests at least 80% of its Net Asset Value in equity or equity-related securities of companies established or having a majority of their economic activities in the Asia Pacific region (excluding Japan) that are listed, traded or dealt in on Regulated Markets worldwide, and in equity-related securities listed, traded or dealt in on Regulated Markets worldwide which provide exposure to the Asia Pacific region (excluding Japan).

The Fund may invest up to 20% of its Net Asset Value in equity or equity-related securities which are not described above and which are listed, traded or dealt in on Regulated Markets worldwide.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

	LOVVCI	INION				1117	gilei Mak	
	Potentially	Lower Rewar	ds		Р	otentially Hig	her Rewards	
Share class B Accumulation	1	2	3	4	5	6	7	
Share class Z Accumulation	1	2	3	4	5	6	7	

Higher Rick

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;

Lower Rick

- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

**Emerging Market risk**: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

**Single country/specific region risk:** Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

### Performance

The Fund declined by 7.4% in sterling terms over 6 months and provided a cumulative return of -9.9% and 19.2% over three and five years respectively to the end of January 2024 (net of fees and tax for the B GBP Accumulation share class).

### **Authorised Fund Manager's Report**

(continued)

for the period ended 31 January 2024 (unaudited)

Key contributors to performance included **Godrej Industries**, which increased as underlying subsidiaries and associates reported strong earnings. **Taiwan Semiconductor Manufacturing (TSMC)** was buoyed by the positive sentiment on Al-related stocks. TSMC has maintained its cutting-edge technology leadership and continued to strengthen its competitive position. On the negative side, **China Mengniu Dairy** has been affected by weak consumer demand as China's economic recovery remains fragile. **Ping An Insurance** reported weaker than expected earnings results, with operating profit affected by losses in its asset management business.

### **Portfolio Changes**

Significant new purchases included **Axis Bank**, one of India's largest private banks. Axis has a strong deposits franchise and should benefit from the structural trend of private sector banks taking market share from the state-owned sector. The Fund also purchased **China Resources Beer Holdings (CR Beer)**, China's largest beer company. The group are executing well, with average selling prices growing steadily and unit costs being reduced, which should improve margins and returns. CR Beer has continued to expand its premium portfolio, which should benefit from the premiumisation trend in China.

The Fund divested Max Ventures and Industries and LEENO Industrial to consolidate the portfolio into higher-conviction opportunities.

#### Outlook

It has been a decade of poor performance across most Asian markets, but there are grounds for greater optimism. One prerequisite for higher returns is lower prices, while slower growth (at the economy and at company levels) could, paradoxically, pave the way for higher shareholder returns. In a tougher operating environment, the better companies tend to strengthen their position and gain market share. That is why "quality" tends to perform well in falling markets.

From that perspective the Fund is relatively optimistic, particularly as the quality of the portfolio has seldom been better and the valuation looks attractive. As always, the investment process and philosophy remains focused on finding the region's best companies that can grow larger over time.

#### Cumulative performance as at 31 January 2024

Group 2	(p)	(p)	(p)	
Interim	0.3830	_	0.3830	

There is no prior year distribution as this share class was launched on 14 September 2023.

### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim-100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim -0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2024 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

The Fund invests at least 80% of its Net Asset Value in a diversified portfolio of equity or equity-related securities of large and mid-capitalisation companies established or having a majority of their economic activities in the Asia Pacific region (excluding Japan) that are listed, traded or dealt in on Regulated Markets worldwide, and in equity-related securities listed, traded or dealt in on Regulated Markets worldwide which provide exposure to the Asia Pacific region (excluding Japan).

The Fund may invest up to 20% of its Net Asset Value in equity or equity-related securities which are not described above and which are listed, traded or dealt in on Regulated Markets worldwide.

Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion at the time of investment.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

	Potentially	Lower Rewar	ds		Р	otentially Hig	her Rewards
Share class B Accumulation	1	2	3	4	5	6	7
Share class B Accumulation (EUR share class)	1	2	3	4	5	6	7

Higher Risk →

Sł Sł Share class B Accumulation (USD share class)

The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund gone up and down in the past;

2

3

4

5

6

The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;

1

← Lower Risk

- The Manager cannot quarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund (except for the B Accumulation (USD share class)), has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss;
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund declined by 9.2% in sterling terms over 6 months and provided a cumulative return of -14.0% and 17.8% over three and five years respectively to the end of January 2024 (net of fees and tax for the B GBP Accumulation share class).

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2024 (unaudited)

Key contributors to performance included **Godrej Industries**, which increased as underlying subsidiaries and associates reported strong earnings. **Taiwan Semiconductor Manufacturing (TSMC)** was buoyed by the positive sentiment on Al-related stocks. TSMC has maintained its cutting-edge technology leadership and continued to strengthen its competitive position. On the negative side, **China Mengniu Dairy** has been affected by weak consumer demand as China's economic recovery remains fragile. **Ping An Insurance** reported weaker-than-expected earnings results, with operating profit affected by losses in its asset management business.

### **Portfolio Changes**

Significant new purchases included **Axis Bank**, one of India's largest private banks. Axis has a strong deposits franchise and should benefit from the structural trend of private sector banks taking market share from the state-owned sector. The Fund also purchased **China Resources Beer Holdings (CR Beer)**, China's largest beer company. The group are executing well, with average selling prices growing steadily and unit costs being reduced, which should improve margins and returns. CR Beer has continued to expand its premium portfolio, which should benefit from the premiumisation trend in China.

The Fund divested Kotak Mahindra Bank on expensive valuations and sold BDO Unibank to consolidate the portfolio into higher-conviction opportunities.

#### Outlook

It has been a decade of poor performance across most Asian markets, but there are grounds for greater optimism. One prerequisite for higher returns is lower prices, while slower growth (at the economy and at company levels) could, paradoxically, pave the way for higher shareholder returns. In a tougher operating environment, the better companies tend to strengthen their position and gain market share. That is why "quality" tends to perform well in falling markets.

From that perspective the Fund is relatively optimistic, particularly as the quality of the portfolio has seldom been better and the valuation looks attractive. As always, the investment process and philosophy remains focused on finding the region's best companies that can grow larger over time.

### Cumulative performance as at 31 January 2024

Time	3	6	1	3	5	Since
period	mths	mths	yr	yrs	yrs	launch*
Fund return %	(1.7)	(9.2)	(15.5)	(14.0)	17.8	105.4
Benchmark return %	2.0	(5.2)	(9.0)	(14.7)	15.1	100.2

### Discrete performance as at 31 January 2024

Time	12 mths to				
period	31/01/24	31/01/23	31/01/22	31/01/21	31/01/20
Fund return %	(15.5)	2.0	(0.2)	23.2	11.2
Benchmark return %	(9.0)	1.8	(7.8)	26.3	6.7

<sup>\*</sup>The Fund was launched on 24 August 2015.

Benchmark: MSCI AC Asia Pacific ex Japan Index.

IA Sector: Asia Pacific Excluding Japan.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim — 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2024 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

The Fund invests at least 70% of its Net Asset Value in equity or equity-related securities issued by companies established or having a majority of their economic activities in the People's Republic of China, Hong Kong and Taiwan which are listed, traded or dealt in on Regulated Markets worldwide.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

·	← Lower Risk Potentially Lower Rewards				Р		gher Risk → her Rewards
Share class A Accumulation	1	2	3	4	5	6	7
Share class B Accumulation	1	2	3	4	5	6	7
Share class A Accumulation (EUR share class)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 6 due to its past performance and the nature of its investments. Shares with a rating of 6 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

**Single country/specific region risk:** Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund declined by 16.0% in sterling terms over six months and provided a cumulative return of -30.2% and 13.4% over three and five years respectively to the end of January 2024 (net of fees and tax for the B GBP Accumulation share class).

Key contributors to performance included **Taiwan Semiconductor Manufacturing (TSMC)**, which was buoyed by the positive sentiment on Al-related stocks. TSMC has maintained its cutting-edge technology leadership and continued to strengthen its competitive position. **MediaTek** rose on signs of recovering end-demand for smartphones. On the negative side, **China Mengniu Dairy** has been affected by weak consumer demand as China's economic recovery remains fragile. **China Merchants Bank** missed the market's expectations, with net profit growth weaker than forecast.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2024 (unaudited)

#### Portfolio Changes

The Fund bought China Resources Beer Holdings (CR Beer), China's largest beer company. The group are executing well, with average selling prices growing steadily and unit costs being reduced, which should improve margins and returns. CR Beer has continued to expand its premium portfolio, which should benefit from the premiumisation trend in China.

The Fund sold Sunny Optical Technology to consolidate the portfolio into more attractive opportunities.

#### Outlook

Investing in China's dynamic market comes with an evolving set of challenges and opportunities. Today, the key challenges include shifts in geopolitics, policy priorities and demographics. In the shorter term, weak consumer confidence and rising unemployment have been additional areas of concern. The quality of Chinese companies and management have improved over the years and there is room for industry leaders to continue to deliver attractive returns in a maturing economy.

As always, the Fund seeks to invest in quality companies with proven management, dominant franchises and conservative financials.

### Cumulative performance as at 31 January 2024

Time period	3 mths	6 mths	1 yr	3 yrs	5 yrs	10 yrs	Since launch*
Fund return %	(7.6)	(16.0)	(25.9)	(30.2)	13.4	106.1	891.9
Benchmark return %	(6.0)	(13.9)	(20.0)	(34.7)	(2.4)	80.1	345.1

### Discrete performance as at 31 January 2024

Time	12 mths to				
period	31/01/24	31/01/23	31/01/22	31/01/21	31/01/20
Fund return %	(25.9)	(2.0)	(3.9)	42.1	14.3
Benchmark return %	(20.0)	(3.9)	(15.0)	37.6	8.6

<sup>\*</sup>The Fund was launched on 1 December 2003.

Benchmark: MSCI Golden Dragon Index.

IA Sector: China / Greater China.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim — 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2024 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

The Fund invests at least 70% of its Net Asset Value in a diversified portfolio of equity or equity-related securities issued by companies that are established, operating or have their economic activity mainly in the Indian subcontinent, and which are listed, traded or dealt in on Regulated Markets worldwide and in equity-related securities listed, traded or dealt in on Regulated Markets worldwide which provide exposure to the Indian subcontinent.

The Fund will invest across all market capitalisations.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

At times, the Fund's portfolio may be concentrated in a small number of holdings.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

Countries of the Indian subcontinent include India, Pakistan, Sri Lanka and Bangladesh.

#### Risks and reward profile

	← Lower Risk			Higher Risk →			
	Potentially Lower Rewards			Р	otentially Hig	her Rewards	
Share class B Accumulation	1	2	3	4	5	6	7
Share class E Accumulation	1	2	3	4	5	6	7
Share class E Accumulation (EUR share class)	1	2	3	4	5	6	7
Share class E Accumulation (USD share class)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 6 due to its past performance and the nature of its investments. Shares with a rating of 6 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Indian subcontinent risk: Although India has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a Fund that invests in a large number of companies.

**Emerging Market risk**: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2024 (unaudited)

#### Performance

The Fund rose by 16.3% in sterling terms over six months and provided cumulative returns of 58.6% and 81.9% over three and five years respectively to the end of January 2024 (net of fees and tax for the B GBP Accumulation share class).

Key contributors to performance included Colgate-Palmolive (India), which continued to perform well after reporting better-than-expected sales and profit growth. Godrej Industries increased as underlying subsidiaries and associates reported strong earnings. On the negative side, Solara Active Pharma Sciences continued to be weak, though there has been an improvement in its operating performance, with a revival in revenues and profitability levels. It has also received regulatory approvals for new products after its plants were inspected recently. Whirlpool of India declined on the back of weak earnings results, with revenues declining amid a challenging consumer demand environment.

#### Portfolio Changes

The Fund bought **HCL Technologies**, a leading IT services company which has around 60% ownership by the founding Nadar family. The company has shown improved performance with an internally promoted management team and has solid capabilities in high-potential areas like cloud and engineering services.

The Fund sold Mahindra Lifespace Developers and Delhivery to consolidate the portfolio into more attractive opportunities.

#### Outlook

The structural tailwinds for companies in India are the strongest they have been in many years. However, valuations in some pockets are stretched, and markets never move in a straight line. In this kind of environment, it is important to stay disciplined and focused. The Fund continues to seek out well-run companies with high levels of governance, strong competitive advantages and long-term growth potential.

In particular, the Investment Manager looks for owners and management teams that are engaged and accessible, and focused on returns. From this perspective, there are still attractive investment opportunities to be found in India on a longer-term view.

#### Cumulative performance as at 31 January 2024

Time	3	6	1	3	5	Since
period	mths	mths	yr	yrs	yrs	launch*
Fund return %	11.8	16.3	27.3	58.6	81.9	67.8
Benchmark return %	12.5	15.5	23.3	58.7	88.2	85.1

#### Discrete performance as at 31 January 2024

Time	12 mths to				
period	31/01/24	31/01/23	31/01/22	31/01/21	31/01/20
Fund return %	27.3	3.3	20.6	5.1	9.1
Benchmark return %	23.3	(1.3)	30.5	9.2	8.6

<sup>\*</sup>The Fund was launched on 8 June 2018.

Benchmark: MSCI India Index.

IA Sector: India.

There was a change from IA Sector: Specialist to IA Sector: India. The IA India Sector was split out of the IA Specialist Sector as of 13 September 2021 to create a new IA India Sector, the Fund joined the new IA India Sector at the same time.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim — 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2024 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

The Fund invests at least 80% of its Net Asset Value in a portfolio of equity or equity-related securities of large and mid-capitalisation companies which are established or have a majority of their economic activities in Japan and which are listed, traded or dealt in on Regulated Markets worldwide and in equity-related securities listed, traded or dealt in on Regulated Markets worldwide which provide exposure to Japan.

Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion at the time of investment.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

At times, the Fund's portfolio may be concentrated in a small number of holdings.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

•	The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how
	much the value of the Fund gone up and down in the past;

2

2

3

3

4

4

5

5

The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;

1

1

- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 6 due to its past performance and the nature of its investments. Shares with a rating of 6 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss;
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

Currency hedged share class risk: Hedging transactions are designed to reduce currency risk for investors. There is no guarantee that the hedging will be totally successful or that it can eliminate currency risk entirely.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a Fund that invests in a large number of companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

### Performance

The Fund fell by 0.5% in sterling terms over six months and provided a cumulative return of -24.7% and 24.7% over three and five years respectively to the end of January 2024 (net of fees and tax for the B GBP Accumulation share class).

### **Authorised Fund Manager's Report**

(continued)

for the period ended 31 January 2024 (unaudited)

Key contributors to performance included Lasertec, which rose on expectations of a pick-up in customer orders for its next-generation ACTIS systems and improved profit margins. Japan Elevator Service reported strong growth in sales and operating profits. This was driven by market share gains in its maintenance & repair segment and accelerating demand in its modernisation business.

On the negative side, **Shoei** fell as it continued to face challenging conditions and low orders visibility in the Chinese market, its main growth driver. **BayCurrent Consulting** declined after the company reported weaker-than-expected operating profits, as fee growth and utilisation of its consultants declined.

#### Portfolio Changes

New purchases included JEOL, a global leader in electron beam technology which is used in scientific and measurement instruments, semiconductor equipment and medical devices. The Investment Manager believes JEOL should benefit from the long-term structural growth in demand for EUV technology. The Fund also bought Koito Manufacturing, the largest maker of automotive headlamps in the world. The company has a strong franchise, robust balance sheet and research and development focus.

The Fund divested Nidec and Murata Manufacturing to consolidate the portfolio into higher-conviction opportunities.

#### Outlook

Amid concerns about the global economy, the Fund has maintained a balanced approach by investing in global franchises with dominant market share in niche industries with long-term growth drivers; and domestic leaders in industries which have low penetration levels in Japan but are well-proven in other developed markets.

The companies the Fund likes to own are managed by strong management teams and can generate sustainable earnings growth and return on equity without relying on borrowing or the macro environment. The Fund owns regional consumer companies, global industrials and medical equipment/services companies with dominant franchises, strong balance sheets and steady cash flow. These businesses should remain relatively defensive in the event of a recession.

#### Cumulative performance as at 31 January 2024

Time period	3 mths	6 mths	1 yr	3 yrs	5 yrs	Since launch*
Fund return %	12.8	(0.5)	(9.3)	(24.7)	24.7	106.5
Benchmark return %	11.9	8.9	13.5	16.6	42.7	94.5

#### Discrete performance as at 31 January 2024

Time period	12 mths to 31/01/24	12 mths to 31/01/23	12 mths to 31/01/22	12 mths to 31/01/21	12 mths to 31/01/20
Fund return %	(9.3)	(6.4)	(11.3)	35.6	22.1
Benchmark return %	13.5	2.9	(0.2)	10.3	11.0

<sup>\*</sup>The Fund was launched on 26 October 2015.

Benchmark: TOPIX Index. The performance shown will show the performance for the MSCI Japan Index up to fourth quarter 2021 and the performance of TOPIX thereafter. Performance will be blended with the two benchmarks chain-linking the historic performance of the MSCI Japan Index with TOPIX ongoing performance from the 9 December 2021.

IA Sector: Japan.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Distribution Tables (continued)

for the period ended 31 January 2024 (unaudited)

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim — 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2024 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the long-term (at least five years).

The Fund invests in a diversified portfolio of equity or equity-related securities of companies that are incorporated or listed, or where a majority of their economic activities take place, in the Asia Pacific region (including Japan) and which are listed, traded or dealt in on Regulated Markets worldwide.

The Fund invests in quality companies which are positioned to contribute to, and benefit from, sustainable development.

The Manager assesses quality by understanding:

- i) the quality of management which includes integrity, attitude to environmental and social impacts, corporate governance, long-term performance, attitude to risk and alignment with minority shareholders. The Manager has a preference for stable, long-term (often multiple generational) stewards leading the Company;
- ii) the quality of the franchise which includes the social usefulness of the products or services, their environmental impacts and efficiency and responsible business practices; and
- the quality of the financials which includes financial performance over the economic cycle, cash flows and debt, with a preference for net cash balance sheets (i.e. companies whose cash resources exceed their debt).

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for Efficient Portfolio Management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

	← Lower Risk  Potentially Lower Rewards			Higher Risk →			
				Potentially Higher Rewards			
Share class A Accumulation	1	2	3	4	5	6	7
Share class A Income	1	2	3	4	5	6	7
Share class B Accumulation	1	2	3	4	5	6	7
Share class B Income	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

**Single country/specific region risk:** investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2024 (unaudited)

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund returned 1.1% in sterling terms over the six months and has provided cumulative returns of 5.4% and 24.8% over three and five years respectively to 31 January 2024 (net of fees and tax for the B GBP Accumulation share class).

Positive contributors included **Tube Investments of India** (India: Consumer Discretionary) which gained as the business reiterated a focus on consistent profitability, **Vinda International** (Hong Kong: Consumer Staples) which rose following the news of a potential takeover bid, and **Japan Elevator Service** (Japan: Industrials) which gained following a recovery in elevator repair sales and strong growth expectations.

Detractors to performance included **Glodon** (China: Information Technology) which faced top-down concerns around economic growth and construction activity in China, **WuXi Biologics** (China: Health Care) which suffered from challenging market conditions, and **Vitasoy International** (Hong Kong: Consumer Staples) which continues to experience stock price pressure relating to sales in China but fundamentals are improving.

#### Portfolio Changes

The Fund initiated new positions in China's dominant domestic home appliance manufacturer, Midea (China: Consumer Discretionary) which is investing cash flow in exciting new technologies and automation, global biologics contract research, development and manufacturing company, WuXi Biologics (China: Health Care), where the stewards have spent the last decade nurturing strong relationships with customers across geographies and building on their research relationships to scale up manufacturing services, and industrial machinery manufacturer, Anest Iwata (Japan: Industrials), a family- stewarded business with a new professional CEO and a franchise which is well positioned to benefit from increased efficiencies in manufacturing outcomes alongside increased demand in the medical sector.

The Fund exited Info Edge (India: Communication Services) for valuation reasons and lower conviction on the long-term resilience of their business model, and Unilever Indonesia (Indonesia: Consumer Staples) following recent management changes.

#### Outlook

Views on investment opportunities in Asia have not changed; the Fund continues to look to invest in high-quality companies that are aligned with sustainable development. The Fund looks for stewards who are low profile, competent, long-term decision makers, franchises free from political agendas and financials that are resilient, not frail. Focus is on quality and the Fund remains indifferent to many of the large, well-known companies, regardless of lower valuations.

### Cumulative performance as at 31 January 2024

Time	3	6	1	3	5	10	Since
period	mths	mths	yr	yrs	yrs	yrs	launch*
Fund return %	5.6	1.1	(3.5)	5.4	24.8	122.2	1,124.2
Benchmark return %	5.6	(0.5)	(1.8)	(5.5)	22.1	102.2	491.8

#### Discrete performance as at 31 January 2024

Time period	12 mths to 31/01/24	12 mths to 31/01/23	12 mths to 31/01/22	12 mths to 31/01/21	12 mths to 31/01/20
Fund return %	(3.5)	6.5	2.6	20.8	(2.0)
Benchmark return %	(1.8)	1.7	(5.4)	21.1	6.7

<sup>\*</sup>The Fund was launched on 6 February 2001.

Benchmark: MSCI AC Asia Pacific Index.

IA Sector: Asia Pacific Including Japan.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim -0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2024 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the long-term (at least five years).

The Fund invests in a diversified portfolio of equity or equity-related securities of large and mid-capitalisation that are incorporated or listed, or where a majority of their economic activities take place, in the Asia Pacific region (excluding Japan) and which are listed, traded or dealt in on Regulated Markets worldwide.

The word "Leaders" in the name of the Fund refers to the focus on large and mid-capitalisation companies. Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion and a minimum free float of US\$500 million at the time of the Fund's first investment. The Manager will only establish an initial position in a company when it is at or above these threshold levels but, if market movements drive the company below the thresholds, the Manager is not forced to sell and is able to increase the holding in the company if, in the Manager's opinion, this presents an opportunity to add to the position.

The Fund invests in quality companies which are positioned to contribute to, and benefit from, sustainable development.

The Manager assesses quality by understanding:

- i) the quality of management which includes integrity, attitude to environmental and social impacts, corporate governance, long-term performance, attitude to risk and alignment with minority shareholders. The Manager has a preference for stable, long-term (often multiple generational) stewards leading the company;
- ii) the quality of the franchise which includes the social usefulness of the products or services, their environmental impacts and efficiency, and responsible business practices; and
- the quality of the financials which includes financial performance over the economic cycle, cash flows and debt, with a preference for net cash balance sheets (i.e. companies whose cash resources exceed their debt).

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

					_		

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2024 (unaudited)

The Fund might also experience the following risks:

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund returned 0.1% in sterling terms over the six months and has provided cumulative returns of 1.7% and 34.2% over three and five years respectively to 31 January 2024 (net of fees and tax for the B GBP Accumulation share class).

Positive contributors included Mahindra & Mahindra (India: Consumer Discretionary) which continues to deliver attractive levels of growth alongside continued investment to build a more robust franchise, Tata Consumer Products (India: Consumer Staples) after management reiterated to investors the prospect for margins to improve further, and Hoya (Japan: Health Care) on the back of improvements in their life care business and a renewal of enthusiasm for semiconductor related companies.

Detractors to performance included **Glodon** (China: Information Technology) which faced top-down concerns around economic growth and construction activity in China, **WuXi Biologics** (China: Health Care) which suffered from challenging market conditions, and **HDFC Bank** (India: Financials) which saw a negative short-term market response to their earnings announcement.

#### **Portfolio Changes**

The Fund initiated new positions in consumer electronics and memory chip manufacturer, **Samsung Electronics** (South Korea: Information Technology) which has a strong franchise, improved governance and an impressive ability to generate cash, China's dominant domestic home appliance manufacturer, **Midea** (China: Consumer Discretionary) which is investing cash flow in exciting new technologies and automation, and global biologics contract research, development and manufacturing company, **WuXi Biologics** (China: Health Care), where the stewards have spent the last decade nurturing strong relationships with customers across geographies and building on their research relationships to scale up manufacturing services.

The Fund exited **Infosys** (India: Information Technology) to fund better risk-reward opportunities in other new investments and **Foshan Haitian Flavouring & Food** (China: Consumer Staples) due to increasing concerns about franchise development.

#### Outlook

Views on investment opportunities in Asia have not changed; the Fund continues to look to invest in high-quality companies that are aligned with sustainable development. The Fund looks for stewards who are low profile, competent, long-term decision makers, franchises free from political agendas and financials that are resilient, not frail. Focus is on quality and the Fund remains indifferent to many of the large, well-known companies, regardless of lower valuations.

<sup>\*</sup>The Fund was launched on 1 December 2003.

Benchmark: MSCI AC Asia Pacific ex Japan Index.

IA Sector: Specialist.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Distribution Tables (continued)

for the period ended 31 January 2024 (unaudited)

#### Share class B Accumulation (USD share class)

			Distribution
	Net		payable
	revenue	Equalisation	31/03/2024
Group 1	(c)	(c)	(c)
Interim	0.1251	_	0.1251
Group 2	(c)	(c)	(c)
Interim	_	0.1251	0.1251

There is no prior year distribution as this share class was launched 27 July 2023.

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim -0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2024 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the long-term (at least five years).

The Fund invests a diversified portfolio of equity or equity-related securities of companies that are incorporated or listed, or where a majority of their economic activities take place in the Asia Pacific region (excluding Japan) and which are listed, traded or dealt in on Regulated Markets worldwide.

The Fund invests in quality companies which are positioned to contribute to, and benefit from, sustainable development.

The Manager assesses quality by understanding:

- i) the quality of management which includes integrity, attitude to environmental and social impacts, corporate governance, long-term performance, attitude to risk and alignment with minority shareholders. The Manager has a preference for stable, long-term (often multiple generational) stewards leading the company;
- ii) the quality of the franchise which includes the social usefulness of the products or services, their environmental impacts and efficiency, and responsible business practices; and
- the quality of the financials which includes financial performance over the economic cycle, cash flows and debt, with a preference for net cash balance sheets (i.e. companies whose cash resources exceed their debt).

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

Higher Risk →

#### Risks and reward profile

	Potentially	Potentially Lower Rewards				Potentially Higher Rewards		
Share class A Accumulation	1	2	3	4	5	6	7	
Share class B Accumulation	1	2	3	4	5	6	7	
Share class A Accumulation (EUR share class)	1	2	3	4	5	6	7	
Share class B Accumulation (EUR share class)	1	2	3	4	5	6	7	

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;

← Lower Risk

- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

**Emerging Market risk**: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2024 (unaudited)

**Smaller companies risk**: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies. For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund returned 0.0% in sterling terms over the six months and has provided cumulative returns of 9.1% and 43.6% over three and five years respectively to 31 January 2024 (net of fees and tax for the B GBP Accumulation share class).

Positive contributors included Mahindra & Mahindra (India: Consumer Discretionary) which continues to deliver attractive levels of growth alongside a more robust franchise, Tube Investments of India (India: Consumer Discretionary) which gained as the business reiterated a focus on consistent profitability, and Vinda International (Hong Kong: Consumer Staples) which rose following the news of a potential takeover bid.

Detractors to performance included **WuXi Biologics** (China: Health Care) which suffered from challenging market conditions, **Glodon** (China: Information Technology) which faced top-down concerns around economic growth and construction activity in China, and **Voltronic Power Technology** (Taiwan: Industrials) which saw a negative short-term market response to their earnings announcement.

#### Portfolio Changes

The Fund initiated new positions in consumer electronics and memory chip manufacturer, **Samsung Electronics** (South Korea: Information Technology) which has a strong franchise, improved governance and an impressive ability to generate cash. China's dominant domestic home appliance manufacturer, **Midea** (China: Consumer Discretionary) which is investing cash flow in exciting new technologies and automation, and global biologics contract development and manufacturing company, **Samsung Biologics** (South Korea: Health Care) which has strong cash generating franchise that is well positioned to help alleviate health-related sustainability headwinds such as growing and aging populations, higher rates of chronic diseases, and demand for lower medicine costs.

The Fund exited Foshan Haitian Flavouring & Food (China: Consumer Staples) due to increasing concerns about franchise development and BRAC Bank (Bangladesh: Financials) due to rising regulatory headwinds for the banking sector in Bangladesh.

#### Outlook

Views on investment opportunities in Asia have not changed; the Fund continues to look to invest in high-quality companies that are aligned with sustainable development. The Fund looks for stewards who are low profile, competent, long-term decision makers, franchises free from political agendas and financials that are resilient, not frail. Focus is on quality and the Fund remains indifferent to many of the large, well-known companies, regardless of lower valuations.

#### Cumulative performance as at 31 January 2024

Time	3	6	1	3	5	10	Since
period	mths	mths	yr	yrs	yrs	yrs	launch*
Fund return %	4.9	0.0	(1.8)	9.1	43.6	176.1	721.6

#### Discrete performance as at 31 January 2024

Time period	12 mths to 31/01/24	12 mths to 31/01/23	12 mths to 31/01/22	12 mths to 31/01/21	12 mths to 31/01/20
Fund return %	(1.8)	5.3	5.5	23.1	7.0
Benchmark return %	(9.0)	1.8	(7.8)	26.3	6.7

<sup>\*</sup>The Fund was launched on 19 December 2005.

Benchmark: MSCI AC Asia Pacific ex Japan Index.

IA Sector: Specialist.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Lowest share price	123.31	124.81	115.09	97.23

Share class B Accumulation (EUR share class) was launched on 28 August 2020.

<sup>\*</sup>The operating charge for the year included a credit due to a write back of prior year accruals. Excluding that adjustment the annualised operating charge had been estimated at 1.05%.

Highest and Lowest share prices are based on official published daily NAVs. The financial statements are produced at a valuation point that is different from the published daily NAV.

Interim

Distribution Tables (continued)

for the period ended 31 January 2024 (unaudited)

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim — 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2024 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the long-term (at least five years).

The Fund invests in a diversified portfolio of equity or equity-related securities of companies that are incorporated or listed, or where a majority of their economic activities take place in the Indian subcontinent and which are listed, traded or dealt in on Regulated Markets worldwide.

Countries of the Indian subcontinent include India, Pakistan, Sri Lanka and Bangladesh.

The Fund invests in quality companies which are positioned to contribute to, and benefit from, sustainable development.

The Manager assesses quality by understanding:

- the quality of management which includes integrity, attitude to environmental and social impacts, corporate governance, long-term performance, attitude to risk and alignment with minority shareholders. The Manager has a preference for stable, long-term (often multiple generational) stewards leading the company;
- the quality of the franchise which includes the social usefulness of the products or services, their environmental impacts and efficiency, and responsible business practices; and
- the quality of the financials which includes financial performance over the economic cycle, cash flows and debt, with a preference for net cash balance sheets (i.e. companies whose cash resources exceed their debt).

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies and other short-term securities listed, traded or dealt in on a Regulated Market. The short-term securities in which the Fund may invest will include securities such as commercial paper, certificates of deposit, treasury bills and bankers' acceptances all rated at investment grade or above or, if unrated, of equivalent quality in the view of the Investment Manager or Sub-Investment Manager. For defensive purposes where necessary to protect investor value during periods of perceived uncertainty and volatility (e.g. market crash or major financial crisis) or in the context of exchange controls, or other situations where, in the opinion of the Investment Manager or Sub-Investment Manager, it may be necessary to protect the interests of investors, the Fund may also hold assets in corporate and/or government debt securities or debentures which must be rated at investment grade or above or, if unrated, of equivalent quality in the view of the Investment Manager or Sub-Investment Manager and which are listed, traded or dealt in on a Regulated Market.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

	← Lower Risk			Higher Risk			
	Potentially Lower Rewards			Р	otentially Hig	her Rewards	
Share class A Accumulation	1	2	3	4	5	6	7
Share class B Accumulation	1	2	3	4	5	6	7
Share class A Accumulation (EUR share class)	1	2	3	4	5	6	7
Share class B Accumulation (EUR share class)	1	2	3	4	5	6	7
Share class B Accumulation (USD share class)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;

- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 6 due to its past performance and the nature of its investments. Shares with a rating of 6 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss;
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2024 (unaudited)

The Fund might also experience the following risks:

Indian subcontinent risk: Although India has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk

**Emerging Market risk**: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund returned 6.5% in sterling terms over the six months and has provided cumulative returns of 55.6% and 87.9% over three and five years respectively to 31 January 2024 (net of fees and tax for the B GBP Accumulation share class).

Positive contributors included **Tube Investments of India** (Consumer Discretionary) which gained as the business reiterated a focus on consistent profitability, **CG Power & Industrial Solutions** (Industrials) which delivered strong results over the period on the back of improved operating performance and increased demand for the company's products, and **Mahindra & Mahindra** (Consumer Discretionary) which continues to deliver attractive levels of growth alongside continued investment to build a more robust franchise.

Detractors to performance included HDFC Bank (Financials) which suffered from a short-term market response to their earnings announcement, Tarsons Products (Health Care) which faced short-term pressure as a boost in sales from COVID-19 wore off, and IndiaMART InterMesh (Industrials) following lower third-quarter net profits results.

#### **Portfolio Changes**

The Fund purchased **RBL Bank** (Financials) which under new management is in the very early stages of building a high-quality lending institution, with a focus on lower risk assets funded mostly by deposits.

The Fund exited **Dabur India** (Consumer Staples) which remains a high-quality company but valuations are expensive, and **BRAC Bank** (Bangladesh: Financials) due to rising regulatory headwinds for the banking sector in Bangladesh.

#### Outlook

In a scenario of rising geopolitical tensions and macroeconomic uncertainty, the Investment Manager continues to believe that bottom-up<sup>1</sup> analysis, with a focus on fundamental quality and sustainable development tailwinds, is the best route to tapping into the opportunities, and protecting against the risks of investing in the Indian subcontinent.

#### Cumulative performance as at 31 January 2024

#### Discrete performance as at 31 January 2024

Time	12 mths to				
period	31/01/24	31/01/23	31/01/22	31/01/21	31/01/20
Fund return %	15.4	3.1	30.7	14.5	5.4
Benchmark return %	23.3	(1.3)	30.5	9.2	8.6

<sup>&</sup>lt;sup>1</sup>Analysing individual companies rather than countries or sectors.

Benchmark: MSCI India Index.

IA Sector: India.

There was a change from IA Sector: Specialist to IA Sector: India. The IA India Sector was split out of the IA Specialist Sector as of 13 September 2021 to create a new IA India Sector, the Fund joined the new IA India Sector at the same time.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

The performance ranking of funds within the IA Specialist sector is not viewed as a fair comparison given the diverse nature of the funds within the sector. Performance statistics are therefore noted versus the benchmark rather than the IA sector. The Specialist sector constituents are defined by the IA as funds that have an investment universe that is not accommodated by the other IA mainstream sectors.

### Stewart Investors Indian Subcontinent Sustainability Fund

Distribution Tables (continued)

for the period ended 31 January 2024 (unaudited)

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim — 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2024 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the long-term (at least five years).

The Fund invests in a diversified portfolio of equity or equity-related securities of companies that are incorporated or listed, or where a majority of their economic activities take place, in the European region\* (excluding the UK) and which are listed, traded or dealt in on Regulated Markets worldwide.

The Fund is not managed to a benchmark and may have exposure to developed markets or Emerging Markets whilst maintaining its geographical diversity.

The Fund has no set target for the number of companies it will invest in but the Manager anticipates that typically the Fund will invest in around 30 to 45 stocks. This does not represent a constraint on the number of holdings which may from time to time fall outside of that range.

The Fund invests in quality companies which are positioned to contribute to, and benefit from, sustainable development.

The Manager assesses quality by understanding:

- i) the quality of management which includes integrity, attitude to environmental and social impacts, corporate governance, long-term performance, attitude to risk and alignment with minority shareholders. The Manager has a preference for stable, long-term (often multiple generational) stewards leading the company;
- ii) the quality of the franchise which includes the social usefulness of the products or services, their environmental impacts and efficiency, and responsible business practices; and
- iii) the quality of the financials which includes financial performance over the economic cycle, cash flows and debt, with a preference for net cash balance sheets (i.e. companies whose cash resources exceed their debt).

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for Efficient Portfolio Management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

\* The European region includes the following countries: Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, The Czech Republic, Greece, Hungary, Poland, Russia, Turkey, Croatia, Estonia, Lithuania, Kazakhstan, Romania, Serbia, Slovenia, Bosnia Herzegovina, Bulgaria, Malta, Iceland and Ukraine.

#### Risks and reward profile

Share class E Accumulation

	1	2	3	4	5	6	7
--	---	---	---	---	---	---	---

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 6 due to its past performance and the nature of its investments. Shares with a rating of 6 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss;
   and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2024 (unaudited)

The Fund might also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

**Single country/specific region risk**: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund returned 1.4% in sterling terms over the six months to 31 January 2024 (net of fees and tax for the B GBP Accumulation share class).

Positive contributors included **Endava** (US: Information Technology) which continues to expand into new segments, geographies and is well-positioned to support customers adapt to a more digital future, **Atlas Copco** (Sweden: Industrials) which benefitted from a strong order book as customers looked to improve energy efficiency, and **Beiersdorf** (Germany: Consumer Staples) which saw accelerating growth from the Nivea brand.

Detractors to performance included **DiaSorin** (Italy: Health Care) where there is concern over the number of strategic programmes running concurrently, **Infineon Technologies** (Germany: Information Technology) which suffered from short-term market challenges related to the auto cycle, and **Adyen** (Netherlands: Financials) which was impacted by concerns relating to their competitive positioning in the United States.

#### Portfolio Changes

The Fund initiated a position in digital transformation consultancy **Endava** (US: Information Technology) which has a strong culture and has enabled successful expansion and scaling of the business, and **Dino Polska** (Consumer Staples: Poland), an operator of medium-sized proximity supermarkets in Poland, which is continuing strong growth into rural areas.

The Fund exited **Rational** (Germany: Industrials) as the company has a limited range of products which could face growing competitive and pricing pressures.

#### Outlook

The Investment Manager believes that the Fund has a portfolio of great sustainability companies which are adaptable, high-quality, with consistent cash flow capabilities and strong competitive positions in different market segments. The leaders of these companies understand the value of staying close to their customers. They steward their balance sheets carefully. They ensure their companies are as well placed to deal with emergent risks as they are to capitalise on long-term opportunities. The Fund will stay focused on the long-term, fundamental prospects of the companies held and those being watched closely. While the composition of the portfolio is in good shape, the Investment Manager will keep searching for companies that might improve overall portfolio risk-return characteristics.

#### Cumulative performance as at 31 January 2024

Time	3	6	1	Since
period	mths	mths	yr	launch*
Fund return %	17.7	1.4	3.0	1.8
Benchmark return %	11.3	3.9	7.8	14.8

#### Discrete performance as at 31 January 2024

Time period	12 mths to 31/01/24	12 mths to 31/01/23
Fund return %	3.0	(3.2)
Benchmark return %	7.8	4.2

<sup>\*</sup>The Fund was launched on 25 January 2022.

Benchmark: MSCI Europe ex UK Index.

IA Sector: Europe ex UK.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

for the period ended 31 January 2024 (unaudited)

#### Distribution in pence per share

Group 1 Interim – Shares purchased prior to 1 August 2023

Group 2 Interim – Shares purchased between 1 August 2023 and 31 January 2024

#### Share class B Accumulation

			Distribution	Distributions
	Net		payable	paid
	revenue	Equalisation	31/03/2024	31/03/2023
Group 1	(p)	(p)	(p)	(p)
Interim	_	_	_	_
Group 2	(p)	(p)	(p)	(p)
Interim	_	_	_	_

This share class is in deficit and therefore not making a distribution.

#### Share class E Accumulation

	Net revenue	Equalisation	Distribution payable 31/03/2024	Distributions paid 31/03/2023
Group 1	(p)	(p)	(p)	(p)
Interim	0.0036	_	0.0036	0.0780
Group 2	(p)	(p)	(p)	(p)
Interim	_	0.0036	0.0036	0.0780

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim -0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### **Authorised Fund Manager's Report**

for the period ended 31 January 2024 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

The Fund invests at least 70% of its Net Asset Value in a diversified portfolio of equity or equity-related securities of large and mid-capitalisation companies in Emerging Markets, which are listed, traded or dealt in on Regulated Markets worldwide, and in those of companies listed on developed market exchanges a majority of whose economic activities take place in Emerging Markets.

Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion at the time of investment.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

← Lower Risk	Higher Risk →
Potentially Lower Rewards	Potentially Higher Rewards

Share class B Accumulation
Share class E Accumulation
Share class B Accumulation (EUR share class)

1	2	3	4	5	6	7
1	2	3	4	5	6	7
1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (more risky), this share class has a rating of 6 due to its past performance (or representative data) and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level.
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

**Emerging Market risk**: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund declined by 7.2% in sterling terms over 6 months and provided cumulative returns of -2.2% and 16.1% over three and five years respectively, to the end of January 2024 (net of fees and tax for the B GBP Accumulation share class).

Key contributors to performance included **Commercial International Bank**, which was buoyed by expectations that Egypt would launch a series of structural reforms in order to secure a loan from the International Monetary Fund. **Alsea** reported sustained growth in same store sales and expanded margins, as it pushed to accelerate new store openings. On the negative side, **JD.com** reported lower-than-expected revenue growth due to increased competition. **Tsingtao Brewery** weakened despite reporting reasonable earnings results and a positive growth outlook based on continued premiumisation.

### **Authorised Fund Manager's Report**

(continued)

for the period ended 31 January 2024 (unaudited)

#### Portfolio Changes

Significant new purchases included **Regional SAB**, the 10th largest bank in Mexico with a strong presence in the northern region. The bank focuses on lending to small and medium enterprises, and has a good track record of profitability due to its risk-aware culture and knowledge of the region. The Fund also purchased **Chongqing Brewery**, one of China's leading breweries and among the most profitable brewers globally, thanks to its premium brand portfolio and efficiency gains under Carlsberg.

The Fund sold Vitasoy International and Grupo Aeroportuario del Sureste to consolidate the portfolio into higher-conviction opportunities.

#### Outlook

The Fund continues to invest in businesses that have proven management teams and competitive advantages that allow them to capitalise on the long-term secular trends that exist across emerging markets. Whether it is the formalisation of the Indian economy, the continued financialisation of the South African population or the growing adoption of enterprise resource planning software by small-to-medium-sized Brazilian companies, the investment opportunities are plenty. Yet, these kinds of businesses are often not well represented in broader indices. Thus the Investment Manager seeks to add value by analysing individual stocks, and selecting the best ones for the portfolio.

Competitive advantages in the form of strong brands, distribution advantages, cost leadership or simply providing a service/product that customers cannot live without, are the main traits that characterise the portfolio. The Fund believes the current correction in share prices presents an excellent opportunity for long-term investors to accumulate leading franchises at attractive prices.

#### Cumulative performance as at 31 January 2024

Time	3	6	1	3	5	Since
period	mths	mths	yr	yrs	yrs	launch*
Fund return %	(1.2)	(7.2)	(10.0)	(2.2)	16.1	20.4
Benchmark return %	2.0	(5.0)	(6.2)	(14.7)	8.5	7.6

#### Discrete performance as at 31 January 2024

Time period	12 mths to 31/01/24	12 mths to 31/01/23	12 mths to 31/01/22	12 mths to 31/01/21	12 mths to 31/01/20
Fund return %	(10.0)	6.6	2.0	10.6	7.3
Benchmark return %	(6.2)	(4.2)	(5.0)	22.8	3.6

<sup>\*</sup>The Fund was launched on 1 December 2017.

Benchmark: MSCI Emerging Markets Index.

IA Sector: Global Emerging Markets.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim — 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2024 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the long-term (at least five years).

The Fund invests in equity or equity-related securities of large and mid-capitalisation companies that are incorporated or listed in Emerging Markets, or those of companies listed on developed market exchanges where a majority of their activities take place in Emerging Market countries.

The word "Leaders" in the name of the Fund refers to the focus on large and mid-capitalisation companies. Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion and a minimum free float of US\$500 million at the time of the Fund's first investment. The Manager will only establish an initial position in a company when it is at or above these threshold levels but, if market movements drive the company below the thresholds, the Manager is not forced to sell and is able to increase the holding in the company if, in the Manager's opinion, this presents an opportunity to add to the position.

The Fund invests in quality companies which are positioned to contribute to, and benefit from, sustainable development.

The Manager assesses quality by understanding:

- i) the quality of management which includes integrity, attitude to environmental and social impacts, corporate governance, long-term performance, attitude to risk and alignment with minority shareholders. The Manager has a preference for stable, long-term (often multiple generational) stewards leading the company;
- ii) the quality of the franchise which includes the social usefulness of the products or services, their environmental impacts and efficiency, and responsible business practices; and
- the quality of the financials which includes financial performance over the economic cycle, cash flows and debt, with a preference for net cash balance sheets (i.e. companies whose cash resources exceed their debt).

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

	← Lower Risk				Higher Risk → Potentially Higher Rewards		
	Potentially Lower Rewards						
Share class A Accumulation	1	2	3	4	5	6	7
Share class B Accumulation	1	2	3	4	5	6	7
Share class B Income	1	2	3	4	5	6	7
Share class Z Accumulation	1	2	3	4	5	6	7
Share class B Accumulation (USD share class)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund (except for Share Class B Accumulation (USD share class) has a rating of 6) has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 or 6 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2024 (unaudited)

The Fund might also experience the following risks:

**Emerging Market risk**: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund decreased by 1.9% in sterling terms over the six months and has provided cumulative returns of 5.7% and -0.6% over three and five years respectively to 31 January 2024 (net of fees and tax for the B GBP Accumulation share class).

Positive contributors included the Fund's exposure to IT services such as **Globant** (Argentina: Information Technology) and **Infosys** (India: Information Technology), where the realisation of anticipated interest rate cuts should make client demand more robust going forward, and **MercadoLibre** (US: Consumer Discretionary) who continued to strengthen their leadership in e-commerce across Latin America.

Detractors to performance included **WuXi Biologics** (China: Health Care) which suffered from challenging market conditions, and **Glodon** (China: Information Technology) which faced top-down concerns around economic growth and construction activity in China, and **HDFC Bank** (India: Financials) which saw a negative short-term market response to their earnings announcement.

#### Portfolio Changes

The Fund re-initiated a position in consumer electronics and memory chip manufacturer, Samsung Electronics (South Korea: Information Technology) which has a strong franchise and impressive ability to generate cash, China's dominant domestic home appliance manufacturer, Midea (China: Consumer Discretionary) which is investing cash flow in exciting new technologies and automation, and inspection and certification services company, Centre Testing International (China: Industrials) which benefits from being one of the first movers in the country and has a good balance between long-term family stewards and a highly experienced professional manager.

The Fund exited **Hoya** (Japan: Health Care) on account of valuation and to fund better risk-reward opportunities in other new investments, and **Clicks** (South Africa: Consumer Staples) due to a combination of possibly slower 10-year growth, stretched valuations and currency depreciation.

#### Outlook

Falling rates should in theory help emerging markets as an asset class as the relative attractiveness of United States Dollar (USD) denominated assets fall and the USD currency weakens. The Fund continues to focus on bottom-up<sup>1</sup> analysis of the fundamental quality of stewards, franchises, and financials and the sustainable development tailwinds these businesses might enjoy. The Investment Manager believes this remains the best way to continue protecting and growing clients' capital in emerging markets.

#### Cumulative performance as at 31 January 2024

<sup>&</sup>lt;sup>1</sup>Analysing individual companies rather than countries or sectors.

Benchmark: MSCI Emerging Markets Index.

IA Sector: Specialist.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

<sup>&</sup>lt;sup>2</sup>The Fund was launched on 1 December 2003.

Distribution Tables (continued)

for the period ended 31 January 2024 (unaudited)

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim — 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Stewart Investors Global Emerging Markets Leaders Sustainability Fund (Closed)

### Authorised Fund Manager's Report

for the period ended 31 January 2024 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the long term (at least 5 years).

The Fund invests in a diversified portfolio of equity or equity-related securities of companies that are incorporated or listed, or where a majority of their economic activities take place in Emerging Markets and which are listed, traded or dealt in on Regulated Markets worldwide.

The Fund invests in quality companies which are positioned to contribute to, and benefit from, sustainable development.

The Manager assesses quality by understanding:

- i) the quality of management which includes integrity, attitude to environmental and social impacts, corporate governance, long-term performance, attitude to risk and alignment with minority shareholders. The Manager has a preference for stable, long-term (often multiple generational) stewards leading the company;
- ii) the quality of the franchise which includes the social usefulness of the products or services, their environmental impacts and efficiency, and responsible business practices; and
- the quality of the financials which includes financial performance over the economic cycle, cash flows and debt, with a preference for net cash balance sheets (i.e. companies whose cash resources exceed their debt).

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for Efficient Portfolio Management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

	← Lower Risk			Higher Risk →			
	Potentially	Potentially Lower Rewards			Potentially Higher Rewards		
Share class A Accumulation	1	2	3	4	5	6	7
Share class B Accumulation	1	2	3	4	5	6	7
Share class A Accumulation (EUR share class)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

**Emerging Market risk**: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2024 (unaudited)

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund rose by 1.6% in sterling terms over the six months and has provided cumulative returns of -3.2% and 21.1% over three and five years respectively to 31 January 2024 (net of fees and tax for the B GBP Accumulation share class).

Positive contributors included **Tube Investments of India** (India: Consumer Discretionary) which gained as the business reiterated a focus on consistent profitability, **Quálitas Controladora** (Mexico: Financials) which continued to deliver solid profitability through consistent underwriting, and **Vinda International** (Hong Kong: Consumer Staples) which rose following news of a potential takeover bid.

Detractors to performance included **Glodon** (China: Information Technology) which faced top-down concerns around economic growth and construction activity in China, **HDFC Bank** (India: Financials) which suffered from a short-term market response to their earnings announcement, and **Voltronic Power Technology** (Taiwan: Industrials) where valuations have become a little stretched.

#### Portfolio Changes

The Fund re-initiated a position in consumer electronics and memory chip manufacturer, Samsung Electronics (South Korea: Information Technology) which has a strong franchise and impressive ability to generate cash, China's dominant domestic home appliance manufacturer, Midea (China: Consumer Discretionary) which is investing cash flow in exciting new technologies and automation, and pneumatic equipment provider, AirTAC International (Taiwan: Industrials), which has strengthened its competitive position and gained market share in a consolidating industry.

The Fund exited Indian IT outsourcer Infosys (India: Information Technology) to fund better risk-reward opportunities in other new investments, Foshan Haitian Flavouring & Food (China: Consumer Staples) due to increasing concerns about franchise development, and BRAC Bank (Bangladesh: Financials) due to rising regulatory headwinds for the banking sector in Bangladesh.

#### Outlook

Falling rates should in theory help emerging markets as an asset class as the relative attractiveness of United States Dollar (USD) denominated assets fall and the USD currency weakens. The Fund continues to focus on bottom-up<sup>1</sup> analysis of the fundamental quality of stewards, franchises, and financials and the sustainable development tailwinds these businesses might enjoy. The Investment Manager believes this remains the best way to continue protecting and growing clients' capital in emerging markets.

#### Cumulative performance as at 31 January 2024

Time period	3 mths	6 mths	1 yr	3 yrs	5 yrs	10 yrs	Since launch <sup>2</sup>
Fund return %	6.2	1.6	0.3	(3.2)	21.1	94.2	312.7

Benchmark return %	(6.2)	(4.2)	(5.0)	22.8	3.6

<sup>&</sup>lt;sup>1</sup>Analysing individual companies rather than countries or sectors.

Benchmark: MSCI Emerging Markets Index.

IA Sector: Specialist.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

<sup>&</sup>lt;sup>2</sup>The Fund was launched on 8 April 2009.

Dictribution

Dictributions

This share class is in deficit and therefore not making a distribution.

#### Corporate tax for all share classes (unaudited)

Interim

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim -0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2024 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the long-term (at least five years).

The Fund invests in a diversified portfolio of equity or equity-related securities of large and mid-capitalisation companies which are listed, traded or dealt in on any of the Regulated Markets worldwide.

The word "Leaders" in the name of the Fund refers to the focus on large and mid-capitalisation companies. Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion and a minimum free float of US\$500 million at the time of the Fund's first investment. This represents a minimum threshold; the Manager generally targets companies with a free float market capitalisation of at least US\$5 billion at the time of the Fund's first investment. The Manager will only establish an initial position in a company when it is above these threshold levels but, if market movements drive the company below the thresholds, the Manager is not forced to sell and is able to increase the holding in the company if, in the Manager's opinion, this presents an opportunity to add to the position.

The Fund is not managed to a benchmark and may have exposure to developed or emerging markets whilst maintaining its geographical diversity.

The Fund invests in quality companies which are positioned to contribute to, and benefit from, sustainable development.

The Manager assesses quality by understanding:

- i) the quality of management which includes integrity, attitude to environmental and social impacts, corporate governance, long-term performance, attitude to risk and alignment with minority shareholders. The Manager has a preference for stable, long-term (often multiple generational) stewards leading the company;
- ii) the quality of the franchise which includes the social usefulness of the products or services, their environmental impacts and efficiency, and responsible business practices; and
- the quality of the financials which includes financial performance over the economic cycle, cash flows and debt, with a preference for net cash balance sheets (i.e. companies whose cash resources exceed their debt).

The investment policy of the Fund may be achieved through investment in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

•	The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how
	much the value of the Fund gone up and down in the past:

The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;

1

A Lauran Dial

- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

**Emerging Market risk**: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

### **Authorised Fund Manager's Report**

(continued)

for the period ended 31 January 2024 (unaudited)

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemotions of its shares.

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a Fund that invests in a large number of companies.

**Smaller companies risk**: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies. For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund returned 3.7% in sterling terms over the six months and has provided cumulative returns of 23.6% and 56.2% over three and five years respectively to 31 January 2024 (net of fees and tax for the B GBP Accumulation share class).

Positive contributors included **Arista Networks** (US: Information Technology) a well-run, focused challenger in internet hardware demonstrating strong growth, **Costco Wholesale** (US: Consumer Staples) which continued growing both its market share and e-commerce business, and **Mahindra & Mahindra** (India: Consumer Discretionary) which continues to deliver attractive levels of growth alongside a more robust franchise.

Detractors to performance included **Infineon Technologies** (Germany: Information Technology) which suffered from short-term market challenges, **Fortinet** (UnS: Information Technology) following a slowdown in revenue growth in line with softer order intake, and **HDFC Bank** (India: Financials) which suffered from a short-term market response to their earnings announcement.

#### Portfolio Changes

The Fund initiated new positions in consumer electronics and memory chip manufacturer, Samsung Electronics (South Korea: Information Technology) which has a strong franchise, improved governance and an impressive ability to generate cash, the world's leading maker of welding equipment, Lincoln Electric (US: Industrials), a high-quality franchise positioned well to benefit from the transition to greener infrastructure tailwinds, and the world's leading industrial gases company, Linde (US: Materials) a high-quality franchise with strong sustainability tailwinds driving growth.

The Fund exited **Nestlé** (Switzerland: Consumer Staples) as it is struggling to grow the business at the same time as it is increasing its levels of debt, **Koninklijke Philips** (Netherlands: Health Care) due to loss of conviction of management to improve the quality of the franchise and culture, and **Cognex** (US: Information Technology) due to the strength of its franchise compared to its valuation.

#### Outlook

The Fund's focus is, as always, to look for high-quality management teams, running businesses that drive human development forward. Buying companies with strong balance sheets that can weather any coming storm, that have structural tailwinds driving their growth and reasonable valuations is the best way to invest clients' savings, and the Fund has found many interesting investment opportunities. The Fund is well diversified, not only across sectors and geographies, but also across growth drivers such as improving energy efficiency, the rise of living standards in India and building clean infrastructure in the US.

#### Cumulative performance as at 31 January 2024

Time period	3 mths	6 mths	1 yr	3 yrs	5 yrs	10 yrs	Since launch*
Fund return %	11.6	3.7	12.1	23.6	56.2	167.6	661.8
Benchmark return %	9.7	5.2	10.9	28.9	67.6	189.9	434.9

### Discrete performance as at 31 January 2024

Time period	12 mths to 31/01/24	12 mths to 31/01/23	12 mths to 31/01/22	12 mths to 31/01/21	12 mths to 31/01/20
Fund return %	12.1	1.8	8.3	16.0	9.0
Benchmark return %	10.9	0.3	15.9	12.3	15.8

<sup>\*</sup>The Fund was launched on 5 November 2001.

Benchmark: MSCI AC World Index.

IA Sector: Global.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund (except for share classes A Accumulation EUR, A Accumulation USD, B Accumulation EUR and B
  Accumulation USD which have a rating of 6) has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating
  of 5 or 6 might have higher risks, but also higher returns;

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2024 (unaudited)

- The risk ratings of the A Accumulation EUR and B Accumulation EUR classes have changed during the period from 5 to 6 due to a change in market volatility.
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

**Smaller companies risk**: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies. For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund decreased by 2.7% in sterling terms over the six months and has provided cumulative returns of 0.4% and 37.7% over three and five years respectively to 31 January 2024 (net of fees and tax for the B GBP Accumulation share class).

Positive contributors included **Beiersdorf** (Germany: Consumer Staples) which saw accelerating growth from the Nivea brand, and general all round and good like-for-like sales, **Admiral** (United Kingdom: Financials) which continues to benefit from higher insurance prices, interest rates and a growing number of policies, and **Nemetschek** (Germany: Information Technology) following strong results.

Detractors to performance included **Fortinet** (US: Information Technology) following a slowdown in revenue growth in line with softer order intake, **Infineon Technologies** (Germany: Information Technology) which suffered from short-term market challenges, and **DiaSorin** (Italy: Health Care), where there is concern over the number of strategic programmes running concurrently.

#### Portfolio Changes

The Fund initiated a new position in digital platform engineering and software development services company, **EPAM Systems** (US: Information Technology), taking advantage of attractive valuations to purchase a business which has favourable positioning in enterprise software development, design and consulting. The Fund also bought leading design and manufacturing service for uninterruptible power supply, **Voltronic Power Technology** (Taiwan: Industrials), which has good stewardship and strong sustainability tailwinds.

The Fund exited **Tokyo Electron** (Japan: Information Technology) due to concerns about its valuation and ability to weather the shifting dynamics of the semiconductor industry.

#### Outlook

As always, the Fund remains focused on buying companies with high-quality management teams and exceptional franchises that are driving human development and alleviating environmental pressures. The portfolio is well diversified, not only across sectors and geographies, but also growth drivers such as improving energy efficiency, the rise of living standards in India and the growth of diagnostics.

#### Cumulative performance as at 31 January 2024

#### Discrete performance as at 31 January 2024

Time	12 mths to				
period	31/01/24	31/01/23	31/01/22	31/01/21	31/01/20
Fund return %	2.0	(2.3)	0.7	20.8	13.6
Benchmark return %	10.9	0.3	15.9	12.3	15.8

<sup>\*</sup>The Fund was launched on 1 November 2012.

Benchmark: MSCI AC World Index.

IA Sector: Global.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim-100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### First Sentier Global Listed Infrastructure Fund

### **Authorised Fund Manager's Report**

for the period ended 31 January 2024 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve an investment return consistent from income and capital growth over the medium to long term (at least three years).

The Fund invests in a diversified portfolio of equity securities issued by companies in the infrastructure sector that are listed, traded or dealt in on Regulated Markets worldwide. The infrastructure sector includes, but is not limited to, utilities (e.g. water and electricity), highways and railways, airports, marine ports and oil and gas storage and transportation.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

	← Lower I	Risk				Hig	gher Risk →
	Potentially Lower Rewards			Potentially Higher Rewards			
Share class A Accumulation	1	2	3	4	5	6	7
Share class A Income	1	2	3	4	5	6	7
Share class B Accumulation	1	2	3	4	5	6	7
Share class B Income	1	2	3	4	5	6	7
Share class B Hedged Accumulation	1	2	3	4	5	6	7
Share class B Hedged Income	1	2	3	4	5	6	7
Share class A Income (EUR share class)	1	2	3	4	5	6	7
Share class B Hedged Accumulation (EUR share class)	1	2	3	4	5	6	7
Share class B Income (EUR share class)	1	2	3	4	5	6	7
Share class B Accumulation (USD share class)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), the B Hedged Accumulation, B Hedged Income, A Income (EUR), B Income (EUR), B Hedged Accumulation (EUR) and B Accumulation (USD) share classes had a rating of 6 due to their past performance and the nature of their investments. Shares with a rating of 6 might have higher risks, but also higher returns; on a scale of 1 (less risky) to 7 (riskier), the remaining share classes have a rating of 5 due to their past performance and the nature of their investments. Shares with a rating of 5 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Single-sector risk: Investing in a single economic sector may be riskier than investing in a number of different sectors. Investing in a larger number of sectors helps to spread risk.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Listed infrastructure risk: The infrastructure sector and the value of the Fund is particularly affected by factors such as natural disasters, operational disruption and national and local environmental laws.

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2024 (unaudited)

Currency hedged share class risk: Hedging transactions are designed to reduce currency risk for investors. There is no guarantee that the hedging will be totally successful or that it can eliminate currency risk entirely.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund decreased by 2.5% in sterling terms over the six months. It has provided cumulative returns of 17.7% and 26.2% over three and five years respectively to 31 January 2024 (net of fees and tax for the B Accumulation share class).

Positive drivers of performance included American Tower (US: Towers / Data Centres), which gained on hopes that interest rates may have peaked. Duke Energy (US: Utilities / Renewables) was buoyed by the appeal of its stable, defensive business model. Grupo Aeroportuario del Sureste (Mexico: Airports) rallied after details emerged of favourable terms for its 2024 - 2028 regulatory period.

**ENN Energy** (China: Utilities / Renewables) underperformed after earnings numbers disappointed, owing to reduced demand from commercial and industrial customers. **NextEra Energy** (US: Utilities / Renewables) lagged after dividend growth forecasts for its renewables-focused subsidiary NextEra Energy Partners were revised lower. **Beijing Capital International Airport** (China: Airports) fell as its traffic recovery trajectory remained slower than hoped.

#### Portfolio Changes

Exelon (US: Utilities / Renewables) was added to the portfolio after an unfavourable regulatory outcome saw its share price fall, creating an appealing entry point for the Fund. Eversource Energy (US: Utilities / Renewables) was added to the portfolio after uncertainty relating to the sale of a stake in an offshore wind project weighed on its share price. The Fund also initiated a position in Norfolk Southern (US: Railroads), on the view that it had scope to benefit from stabilising costs and improving volumes.

CSX (US: Railroads) was sold on a relative valuation basis. PPL (US: Utilities / Renewables) and CenterPoint Energy (US: Utilities / Renewables) were divested in favour of positions in higher-conviction names within the US utilities sector.

#### Outlook

Global listed infrastructure delivered muted returns in 2023, owing to concerns for rising interest rates and a broad-based shift away from defensive assets. Earnings within the asset class have proved resilient, and valuations are now appealing.

#### Cumulative performance as at 31 January 2024

Time period	3 mths	6 mths	1 yr	3 yrs	5 yrs	10 yrs	Since launch*
Fund return %	4.9	(2.5)	(6.4)	17.7	26.2	130.1	250.7
Benchmark return %	4.9	(1.5)	(6.0)	19.8	25.3	125.8	184.6

#### Discrete performance as at 31 January 2024

Time	12 mths to				
period	31/01/24	31/01/23	31/01/22	31/01/21	31/01/20
Fund return %	(6.4)	12.2	12.0	(10.7)	20.0
Benchmark return %	(6.0)	9.7	16.2	(11.6)	18.3

<sup>\*</sup>The Fund was launched on 8 October 2007.

Benchmark: FTSE Global Core Infrastructure 50/50 Index.

IA Sector: Infrastructure.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim — 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

#### Authorised Fund Manager's Report

for the period ended 31 January 2024 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve an investment return from income and capital growth over the long term (at least 5 years).

The Fund invests at least 70% of its Net Asset Value in a diversified portfolio of equity-related securities issued by companies in the infrastructure sector that are listed, traded or dealt in on Regulated Markets worldwide. The infrastructure sector includes, but is not limited to, utilities (e.g. gas, water and electricity), highways and rail tracks, airports and oil and gas storage and transportation.

The Manager intends to invest in a portfolio which is diversified by infrastructure sector, country and asset type / business model. The Fund has no set target for the number of companies it will invest in but the Manager anticipates that typically the Fund will invest in around 35 – 45 stocks. This does not represent a constraint on the number of holdings which may from time to time fall outside of that range.

Starting with all investible assets, the Fund's investment universe will be determined by removing:

- companies with a market capitalisation of less than US\$500m;
- those companies that do not exhibit the targeted infrastructure characteristics, namely high barriers to entry, strong pricing power, predictable cashflows and sustainable long term growth; and
- those companies with excessive leverage (being borrowing levels that either in the past have proved difficult to service or which exceed those that the Manager considers prudent for a company of that type) or which operate in unfavourable legal and regulatory environments which are either subject to change at short notice, that have proved inconsistent in the past and / or face higher risk of political interference.

Within this investment universe, the Manager assesses and researches companies and their ability, and measures taken, to contribute to, or benefit from moves to implement, the UN Sustainable Development Goals. The research and analysis may be obtained through company reports and filings, government research, industry studies, broker research reports, financial reports and direct contact with the companies; for example engagement with company management or a company board to highlight concerns or areas of potential improvement and to promote change or improvement, including on environmental, social and governance (ESG) issues. This is supplemented with third party specialist research when appropriate.

The Fund will seek to invest through a selection process which assesses companies by valuation and quality criteria and which also incorporates a ranking of broader ESG issues. The Fund then applies an assessment process focussed only on ESG factors which provides additional information with which investment decisions are made. This assessment process can be thought of in three stages:

- Sustainability ranking
  - Stocks are ranked using six ESG factors; namely Environmental, Social, Governance, Alignment of Interests, Board and Disruption. This shows which stocks fare best from a sustainability perspective alone.
- Identify companies that are positively repositioning their business to becoming more sustainable The Manager seeks to identify those companies it believes are repositioning themselves to be more sustainable. It is looking for companies that are committed to sustainable development.
- Continuous engagement
  - Engagement is an ongoing process of outreach to companies, regulators and other stakeholders. It provides the Manager with a way of driving change, as well as giving it a better understanding of how companies are performing.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

← Lower Risk Higher Risk → Potentially Lower Rewards Potentially Higher Rewards Share class B Accumulation

Share class F Accumulation Sł Sh

Stidle Class E Accultulation	l I	_ Z	) )	4	)	0	/
Share class E Income	1	2	3	4	5	6	7

					_		

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;

### **Authorised Fund Manager's Report**

(continued)

for the period ended 31 January 2024 (unaudited)

- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 6 due to its past performance and the nature of its investments. Shares with a rating of 6 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

**Emerging Market risk**: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

**Single-sector risk**: Investing in a single economic sector may be riskier than investing in a number of different sectors. Investing in a larger number of sectors helps to spread risk.

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a fund that invests in a large number of companies.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Listed infrastructure risk: The infrastructure sector and the value of the Fund is particularly affected by factors such as natural disasters, operational disruption and national and local environmental laws.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

Currency hedged share class risk: Hedging transactions are designed to reduce currency risk for investors. There is no guarantee that the hedging will be totally successful or that it can eliminate currency risk entirely.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund decreased by 3.0% in sterling terms over the six months to 31 January 2024 (net of fees and tax for the B Accumulation share class).

Positive drivers of performance included **Union Pacific** (US: Railroads) and **Norfolk Southern** (US: Railroads), which rose during the final quarter of the year, aided by improving productivity metrics and indications of volume recovery. **American Tower** (US: Towers / Data Centres) gained on hopes that interest rates may have peaked.

However NextEra Energy (US: Utilities / Renewables) lagged after dividend growth forecasts for its renewables-focused subsidiary NextEra Energy Partners were revised lower. Peer Eversource Energy (US: Utilities / Renewables) underperformed as uncertainty relating to the sale of a stake in an offshore wind project weighed on its share price. Exelon (US: Utilities / Renewables) fell after an unfavourable regulatory outcome in its Illinois service territory.

#### Portfolio Changes

GAP (Mexico: Airports) was added to the portfolio. Concerns around the terms of Mexico's airport regulations provided an attractive entry point into a high quality company with strong medium term traffic growth drivers. NextEra Energy Partners (US: Utilities / Renewables) was added to the portfolio after lower dividend growth expectations saw the stock trade down to appealing levels. Severn Trent (UK: Water / Waste) was also added to the portfolio, having recently filed a constructive business plan to the UK water regulator.

No holdings were divested from the portfolio over the six month period ending 31 January 2024.

#### Outlook

Earnings growth within the asset class is likely to be underpinned by a number of structural growth themes over coming years. The Investment Manager remains optimistic about the substantial investment opportunities associated with the decarbonisation of the world's energy needs. Utilities, which represent about a half of the Fund's listed infrastructure opportunity set, are positioned to derive steady, regulated earnings growth by building solar and wind farms, and by upgrading and expanding the networks needed to connect these new power sources to the end user.

#### Cumulative performance as at 31 January 2024

#### Discrete performance as at 31 January 2024

Time	12 mths to	12 mths to
period	31/01/24	31/01/23
Fund return %	(6.9)	5.6
Benchmark^ return %	(7.6)	8.7

<sup>\*</sup>The Fund was launched on 8 February 2021.

IA Sector: Infrastructure.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Interim	0.8605	0.5275	1.3880	1.0832

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim — 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

#### Authorised Fund Manager's Report

for the period ended 31 January 2024 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve an investment return from income and capital growth over the long-term (at least five years).

The Fund invests at least 70% of its Net Asset Value in a broad selection of equity or equity-related securities issued by real estate investment trusts or companies that own, develop or manage real property located worldwide and which are listed, traded or dealt in on Regulated Markets worldwide.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for Efficient Portfolio Management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

	← Lower Risk			Higher Risk →				
	Potentially	Lower Rewar	ds		Potentially Higher Rewards

Share class B Income (EUR share class)	1	2	3	4	5	6	7	

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 6 due to its past performance and the nature of its investments. Shares with a rating of 6 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

**Single-sector risk:** Investing in a single sector may be riskier than investing in a number of different sectors. Investing in a larger number of sectors helps spread risk.

**Property securities risk:** The Fund invests in the shares of companies that are involved in property (such as real estate investment trusts) rather than in property itself. The value of these investments may fluctuate more than the underlying property assets.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Currency hedged share class risk: Hedging transactions are designed to reduce currency risk for investors. There is no guarantee that the hedging will be totally successful or that it can eliminate currency risk entirely.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

### **Authorised Fund Manager's Report**

(continued)

for the period ended 31 January 2024 (unaudited)

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a Fund that invests in a large number of companies.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund increased by 1.0% in sterling terms over the 6 months and has provided cumulative returns of +5.3% and +14.2% over three and five years respectively to 31 January 2024 (net of fees and tax for the B GBP Accumulation share class).

#### Portfolio Changes

The Fund increased its weighting in **Equinix** in the period, a class-leading US data centre REIT. The rationale for the purchase was driven by the underlying financial growth prospects for Equinix.

The Fund re-positioned its US multifamily housing REIT holdings in the period by initiating a position in **Apartment Income REIT** which was partially funded via the sell down of **Equity Residential**. Similarly, the Fund sold **UDR** in the period and recycled the proceeds into **AvalonBay Communities**. The rationale for the switch is driven by AvalonBay's superior growth profile as a result of the company's market selection and development pipeline.

In October, the Fund repositioned its US healthcare REIT exposure by building a position in **Ventas**, funded by reducing some of the **Welltower** and **Healthpeak Properties** holdings. The Fund also exited its position in **Equity LifeStyle Properties** in December. The rationale for the sale was driven by year-to-date outperformance and subsequent absolute as well as relative valuation.

#### Outlook

Increases in the cost of debt and lower levels of debt availability have placed pressure on real estate values, however the Fund is optimistic on property types that are able to continue to demonstrate continued pricing power as the Investment Manager navigates an economic slowdown. Furthermore, strong structural trends such as e-commerce adoption, demographics and aging populations, decentralisation of cities, falling home ownership rates and the growth in data consumption should continue to drive performance into the future.

#### Cumulative performance as at 31 January 2024

Time	3	6	1	3	5	10	Since
period	mths	mths	yr	yrs	yrs	yrs	launch*
Fund return %	9.5	1.0	(4.4)	5.3	14.2	92.5	158.0

#### Discrete performance as at 31 January 2024

Time	12 mths to				
period	31/01/24	31/01/23	31/01/22	31/01/21	31/01/20
Fund return %	(4.4)	(9.1)	21.1	(10.3)	20.9
Benchmark return %	(6.6)	(5.6)	22.6	(14.1)	10.7

<sup>\*</sup>The Fund was launched on 12 September 2006.

Benchmark: FTSE EPRA Nareit Developed Index.

IA Sector: Property Other.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 21.71% of the dividend is received as franked investment income.

Interim – 19.07% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 59.22% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.
